Mindtech Apps was foundend in 2015 in order to create innovative mobile applications. Mindtech's main focus is EEG based software development. Since our launch 3 EEG based application were brought to market, and 2 more applications are under development. There are currently six developers working on our projects backed up by interns and market validation interns.

Mindtech Apps works in cooperation with the University of Notre Dame (USA) - as research & market validation partber, Pazamany Peter University Faculty of IT and Bionics (HUN) - as research partner, and the Hungarian Academy of Sciences's Inst. of Cognitive Neuroscience and Psychology (HUN) as research partner.
